

Choose from 2, 3 and 4 panel configurations all featuring smooth gliding operation and space saving style.

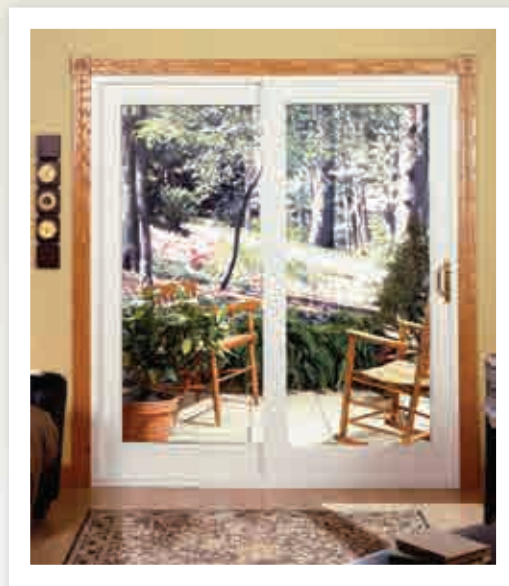

- 1** In addition to its beauty, the Riviera French Slider incorporates structurally engineered metal reinforcement with thermal insulation into the sash frame to enhance Strength, Rigidity and Energy Efficiency.
- 2** Durable anodized aluminum threshold resists wear from traffic and the elements.
- 3** Stainless steel tandem rollers with sealed stainless steel ball bearings offer reduced friction and wear to glide effortlessly on the aluminum raised Monorail Track with stainless steel cap.

Riviera French Sliding Patio Door

The sophistication of the Riviera French Sliding Patio Door is reflected in wide rails and contoured moldings that embrace the glass and enhance the refined design.

Combining the traditional wide rail look of a French Door into a sliding door makes it a perfect choice where space or traffic patterns may not allow a hinged or swing style door.
